CAREER OBJECTIVE

Computer Science Engineering student skilled in Java, Python, Spring Boot, and MySQL, with hands-on experience building full-stack web applications and data-driven solutions. Interested in pursuing an entry-level Full Stack Developer / Web Developer role to apply strong programming, problem-solving, and software development skills to real-world projects.

EDUCATION

Bachelor of Engineering - Computer Science & Engineering

Expected May 2027

Shree Venkateshwara Hi-Tech Engineering College | CGPA: 7.92 / 10.0

TECHNICAL SKILLS

- Programming Languages: C, C++, Python, Java, JavaScript
- Frontend Development: HTML5, CSS3, JavaScript, Bootstrap, Responsive Design
- Backend Development: Java, Spring Boot, REST APIs, Python
- Databases: MySQL
- Tools & Platforms: Git, GitHub, VS Code, Eclipse IDE, Apache Tomcat

INTERNSHIP EXPERIENCE

Data Analytics Intern - Thiranex

Tools & Technologies: Python, Pandas, NumPy, Scikit-learn (StandardScaler, KMeans), Matplotlib, Seaborn, HTML, CSS, Chart.js, SheetJS

- Implemented customer segmentation models using Scikit-learn (KMeans, StandardScaler), uncovering 5+ distinct customer groups to guide targeted strategy.
- Engineered predictive analytics models in Python, improving trend-forecast accuracy by ~15%.
- Deployed an interactive, web-based sales & revenue dashboard as a Web Developer using Chart.js and Seaborn, cutting manual reporting time by 30%.
- Optimized data cleaning workflows with Pandas and NumPy across 10,000+ records, improving data accuracy by 25%.

PROJECTS

Skyzo Trips | Full-Stack Tourism Booking Platform

Tools & Technologies: Java, Spring Boot, HTML5, CSS3, JavaScript, Bootstrap, MySQL

- Engineered a full-stack tourism booking platform, cutting manual trip-planning time by 50%.
- Implemented secure backend REST APIs in Java and Spring Boot, streamlining booking workflows for destinations and packages.
- Built a responsive frontend with destination search, filtering, and secure authentication, improving page responsiveness by ~20% across devices.
- Architected and deployed a MySQL database supporting 500+ tour packages, user profiles, and booking records.

Blood Bank Management System | Full-Stack Web Application

Tools & Technologies: Java, Spring Boot, Apache Tomcat, MySQL, HTML5, CSS3

- Deployed a centralized web application for donor management, cutting donor search time by 60% during emergencies.
- Implemented the backend in Java on Apache Tomcat, ensuring reliable, high-uptime server performance.
- Optimized role-based access control and donor search, enabling admins to locate compatible donors in under 10 seconds.
- Designed a structured MySQL schema managing donor and blood-stock records, improving retrieval speed by ~35%.

CERTIFICATIONS

- Certified in AI-Powered Cyber Security Defense through bootcamp training
- Full Stack Web Development Online Certification - Java / Spring Boot
- NPTEL Certification - Programming in Java

ADDITIONAL EXPERIENCE

- Delivered a presentation on emerging technologies including blockchain and cybersecurity.
- Won 3rd Prize in a Technical Quiz Competition, demonstrating strong analytical and problem-solving skills.

SOFT SKILLS

Leadership | Adaptable to New Technologies | Team Collaboration | Quick Learner
